

# THE ARCHITECTURAL PRACTICE IS CHANGING.

## ARCHICAD & BIM WORKSHOP.

Digitisation of the building industry allows more information exchange and a shortened project lifecycle. As future architects, you will have to adopt new technologies to meet growing demand from clients.

Join this workshop to learn about Building Information Modeling and Algorithmic Design from international experts from Europe and Hong Kong.

Best projects will be awarded with internship opportunity at local architecture firm and an iPad Pro.

## The future starts now!

### Topics:

- ARCHICAD basics & BIM concepts.
- Energy Analysis.
- BIMx for mobile and table
- TEAMWORK and BIM Server
- Rendering
- Mass modelling
- Coordination with other softwares
- Algorithmic Desing. Rhino - Grasshopper ARCHICAD workflow.
